

Python for Data Science Aug 2019

Saturday, August 3, 2019 07:54

Duration: 12 weeks / 4 hours per week

#	Schedule	Topic	Book	Website	Demo	Implementation
1	Aug 03	<ul style="list-style-type: none"> - Philosophy - What to expect / demand - Course outline & schedule - GIT - Jupyter Notebooks - Python: <ul style="list-style-type: none"> • Objects and their properties • Functions and modules • Scalars • Sequences - Where to look for more information - Notebooks <ul style="list-style-type: none"> • data model I • utils.py • data model II - Homework 1: Roll your own utils.py 	Pro Git, Scott Chacon and Ben Straub (https://git-scm.com/book/en/v2)	Python 3 Documentation	Face recognition	
2	Aug 04	<ul style="list-style-type: none"> - Python: <ul style="list-style-type: none"> • Sequences • Understanding parameter passing • Lists v. tuples, and the operations on lists • Iterating over lists & tuples • Ranges, using ranges - Mo' GIT - Notebooks: <ul style="list-style-type: none"> • data model II • utils.py • type hierarchy • parameters to functions - Homework 2: Configure your GitHub account (with ssh access). Create a repository and add your notebooks to it 	The Art of Computer Programming, D. E. Knuth	What the f*ck Python!	Matrix-vector multiplication (animated)	
3,4	Aug 11	<ul style="list-style-type: none"> - Jupyter, iPython, PyCharm, ... - Python <ul style="list-style-type: none"> • Slices as views • Ternary expressions • List comprehensions • Ranges • Random numbers - Applications <ul style="list-style-type: none"> • Fibonacci • Sieve - Notebooks: 	The Visual Display of Quantitative Information, Edward Tufte	Top500 Supercomputers	Moonshift	<ul style="list-style-type: none"> - Fibonacci - Sieve of Eratosthenes

		<ul style="list-style-type: none"> • ranges • Ternary expr and comprehensions <p>- Jupyter notebook</p> <ul style="list-style-type: none"> • Documentation • LaTeX <p>- Homework:</p> <ul style="list-style-type: none"> • Five ways to Fibonacci!! • Runtime measurement & optimization 				
5,6	Aug 18	<p>- Python</p> <ul style="list-style-type: none"> • Pretty printing, formats • Random number generation • Generators • Decorators <p>- Python: Bisection</p> <p>- Homework:</p> <ul style="list-style-type: none"> • Solve the exercise functions using the Bisection method <p>Bisection:</p> <ul style="list-style-type: none"> • Run bisection for other methods • Calculate the number of iterations • Optimize your code! <p>Random numbers: Calculate pi using</p> <ul style="list-style-type: none"> • Area of circle/square • Buffon's needle <p>Taylor series</p> <ul style="list-style-type: none"> • Calculate sin, cos • Write testing routine • Optimize 	Programming Pearls, Jon Bentley	Latency Numbers Every Programmer should know	sig.c	<p>- Bisection Method</p> <p>- Taylor Series</p>
7,8	Aug 25	<p>- Ketchup!</p> <ul style="list-style-type: none"> • Homework +/- • Git • Generators • Logging(?) <p>- π^e v. e^π</p> <p>- Other ways of running</p> <ul style="list-style-type: none"> • Jupyter • Spyder • Editor + Execute • iPython • PyCharm 	Factfulness, Hans Rosling, Ola Rosling and Anna Rosling Ronnlund Also see: The Best Stats You've Ever Seen	https://learnitbranching.js.org/	sig.c	- Packaging!
